

Join us in a collaborative event to shape the future of integration.

In only a couple of weeks,  
we have managed to mobilize  
key actors, problem solvers  
and tech-savvy people for  
our pilot.

---

Through tech and collaboration Refugee Tech is working with the purpose of innovating and accelerating the currently stagnated integration process in Sweden.

**Now we need you,  
the UX designer..  
the developer..**

For our Hackathon at King's locals 6-7th February.

# Solving Employment issues

Our pilot is divided up into three phases - each involving experts within it's field.

## Challenge creation

28 January 15:00-18:00

Identify and combine problems to create challenges

Brief

## Ideation + Solution

3 February 13:00-19:00

Come up with creative ideas that solve the challenges and form sustainable solutions

**HYPER ISLAND**

Concepts

## Hackathon

6 February 09:00-21:00

7 February 09:00-17:00

Design and develop tech prototypes with the solutions in mind

# Challenge Creation

## Background:

The interested actors (as seen below) have been invited to a workshop with focus on "Employment". Following actors have substantial expertise within the area of focus and will work together in order to identify challenges that the newcomers face during the integration process. The outcome of the workshop will be challenges that will be taken to the next phase, where sustainable solutions will be generated.

## Agenda:

- 28 January**
- 15:00 - Check In
  - 15:15 - Introduction
  - 15:30 - Workshop - First phase
  - 16:30 - Break
  - 16:40 - Workshop - Second phase
  - 17:45 - Final presentations
  - 18:00 - Wrap up

## Interested Actors

### Employer/Business sector

### Mentorship/Coaching

**YRKES**mentor  
400contacts

### Recruiter

### Objective Rep. of Refugees

### Political/Legal Actors

Länsstyrelserna

REGERINGSKANSLIET  
Arbetsmarknadsdepartementet

# Ideation + Solution

## Background:

Hyper Island and PwC have been invited to a workshop to create sustainable solutions out of the challenges that were identified during a workshop on the topic "Employment". The aim of the workshop is to mix the best of two worlds where creativity meets analytical excellence in order to form ideas for sustainable solutions. The outcome of the workshop will result in a hackathon in King's locals where people from Sweden's developer community will make prototypes out of the solutions.

Actors from the workshop held on the 28th of January will act as an expert and feedback panel.

## Agenda:

**3 February**

13:00 - Check In

13:15 - Introduction

13:30 - Ideation

16:30 - Break

16:40 - Concept development

17:40 - Team to Team sessions

18:15 - Final presentations

19:00 - Wrap up

## Confirmed Actors

**HYPER ISLAND**

# Hackathon

## Background:

The pilot process will finish with a hackathon in King's office where Refugee Tech in collaboration with Sweden's developer community Kodapor will challenge techies to form teams that will participate in the hackathon. During two days the techies will code on prototypes out of the generated sustainable solutions from the workshop held on the 3rd of February.

Techies have the option to create their own teams, apply individually or with a team from their company. The outcome of the hackathon will be prototypes.

## Confirmed Actors

Swedens  
developer community  
with over 8000 members

## Agenda:

### 6 February\*

09:00 - Check In  
21:00 - Finish

### 7 February\*

09:00 - Start  
17:00 - Finish

Let's help our future colleagues,  
classmates and neighbours.
